

Kaliningrad Regional Energy Efficiency Centre (KREEC)

Kaliningrad Oblast belongs to the Baltic region. It expands rapidly due to both, national and international focus connected to the EU extension, the international cooperation in the field of energy and environment related issues within the Baltic Sea region, and the growing efforts related to the Kyoto Protocol and Joint Implementation.

Kaliningrad Regional Energy Efficiency Centre (KREEC) is a focal point for energy efficiency for Kaliningrad Oblast. The Centre is a non-profit, non-governmental organization which was established by the Kaliningrad Regional Administration, Kaliningrad City Administration and Yantargosenergonadzor.

KREEC was founded and started its activities in the spring of 1999 and has since acted as a catalyst in the introduction of energy efficiency in the Region.

The Centre is an independent local coordinating organization, optimally deploying the scarce regional resources, strengthening the expertise in the Region. KREEC is working with energy efficiency including rational structures, energy efficient and environmentally clean technology, correct use of technology and effective operation of energy systems, and understanding and motivation on all levels. The focus areas are heat, electricity, fuels and water.
